(54) Title: SYSTEM AND METHOD FOR MANAGING EMERGENCY SITUATIONS THROUGH A MOBILE TERMINAL

(57) Abstract: A system is described, and the corresponding method, for the management of emergency situations by means of a mobile terminal (1) with an electronic board (2), apt to implement access functions to a mobile phone network and comprising memory areas (23), containing personal data of the owner of said electronic board (2). The invention consists in that said electronic board (2) shows aid functions which make it at least partially operative when said mobile terminal operates in an emergency state.
